

## Beyond Cars

Get to know the future of automobiles.

[YOU are big brother: Control and track your car from the 'net](#)

The screenshot shows the INILEX website interface. At the top left is the INILEX logo. To its right is a 'Select Vehicle' dropdown menu currently set to 'Marks Vehicle'. Further right are social media icons and a 'Sign Out' button. Below this is a navigation bar with links for 'Control', 'Mapping', 'Account', 'Notifications', 'Event List', and 'Support'. The main content area is titled 'Vehicle Control Options' and contains a list of controls:

Icon	Control Name	Buttons
	Request to start vehicle	Start
	Request to Lock vehicle	Lock
	Request to Unlock vehicle	Unlock
	Request to sound vehicle alarm	Alarm
	Request to Locate vehicle	Locate
	Set vehicle Speed Notification	Speed <input type="text" value="0"/> MPH <input type="button" value="Turn Off"/> <input type="text" value="off"/>
	Set Ignition Disable	<input type="button" value="Set"/>
	Set Motion Notification	<input type="button" value="Begin"/> <input type="button" value="Stop"/> <input type="button" value="Turn Off"/> <input type="text" value="off"/> <input type="text" value="off"/>
	Set Vacation mode	<input type="button" value="Set"/> <input type="button" value="Turn Off"/>
	Car-Jacking Alarm	<input type="button" value="Alarm"/> <input type="button" value="Turn Off"/> <input type="text" value="off"/>

The world is certainly not lacking devices that allow you to track and control your vehicle from afar. The newest breed of these systems was developed by Inilex, which allows a subscriber/user to do everything from unlock their doors, start their vehicle, sound the alarm, disable the engine or give the location of their ride. The system can be used by logging on to Inilex's website via a PC, calling a toll-free number or using a PDA with access to the internet.

Aside from providing a bit more convenience and protection, the major draw for some users, namely parents, is the ability to not only track the movements of the vehicle, but also be alerted via text message or email if the kiddies stray from set boundaries or operate the vehicle during certain times of the day or night (no more ditching school or sneaking into the love interest's window at 3 AM).

[Straightline](#) has several links that provide more information and Inilex has a [demo](#) posted on their site.
